Art Unit 1816

15. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-13,29,30,53-56 are drawn to methods for separating cells, classified in Class 435, subclass 2.

II. Claims 14-28,34-51 are drawn to cells, a method for making said cells and kits containing cells, classified in Class 435, subclass 240.1.

III. Claims 31-33,52,57-68 are drawn to a method of determining secretion of a product, classified in Class 435, subclass 7.1.

16. Because the instant application has been filed under 35 U.S.C. § 371, applicant can elect either invention I and invention II or inventions II and III.

17. Inventions I and III are different methods of use which use different ingredients to achieve different results. Invention I is drawn to methods for separating cells, while invention III is drawn to a method of determining secretion of a product. Invention I uses a cell separation step not used in invention III.

18. Because these inventions are distinct for the reasons given above and the search required for Group I/II is not required for Group II/III and Groups I and III have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

19. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Art Unit 1816

20. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
